SAVES Programming & Outreach

If your organization/department/group would like to request programming or outreach from SAVES (such as tabling & presentations), fill out this form: https://forms.office.com/r/6JecFzMjvg

We can tailor most of our programming to meet the needs of different groups/organizations by incorporating information such as unique barriers to prevention & responses and resources that are relevant to your group. SAVES understands the importance of intersectionality in equitable sexual violence prevention/response & has integrated it into the training our members receive. Intersectionality and concepts related to identity are nuanced and ever evolving and we cannot claim to be experts on every topic. Upon request, we can hold space for informal group discussions about specific aspects of identity as they relate to sexual/relationship violence and provide info on related campus and community resources.
